# Manage Projects on the Go with the ProjectManager **Mobile App**
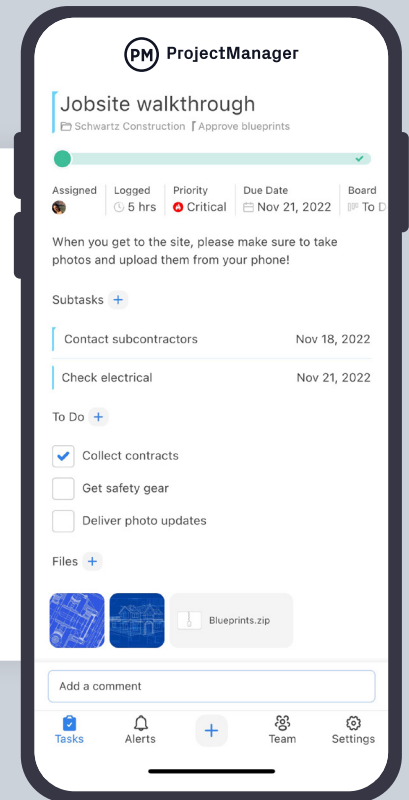

PM **ProjectManager**

Download on the **App Store**

GET IT ON **Google Play**

✓ Upload photos and files
✓ Log time
✓ Update tasks and projects
✓ Manage teams
✓ Track progress

## Field teams can update tasks from anywhere

In the field, team members can use the app to update task information with comments, photos, progress, time, priority and more. Take the app with you to the jobsite to upload the latest photos to tasks and loop in other stakeholders with a comment or tag. Because task updates happen alongside the work, it's easy to see progress.

## Managers get the latest project information

Staying connected via the app allows managers to respond to changes as they happen, regardless of their working location. If there's an emergency, managers are automatically alerted so they can take action immediately—no desktop needed.
